We are pleased to invite you to the upcoming **34th IASGO World Congress** to be held at the Palazzo Della Gran Guardia in Verona between 9-12 September 2023.

IASGO (International Association of Surgeons, Gastroenterologists, and Oncologists) founded in 1988 has **more than 1700 members from over 90 countries worldwide** and its main mission is the globalization of medical knowledge and expertise through continuing medical education.

The world's leading experts in surgery, oncology and gastroenterology will share recent findings in the **medical and surgical treatment of gastrointestinal disease** to improve patient care and quality standards.

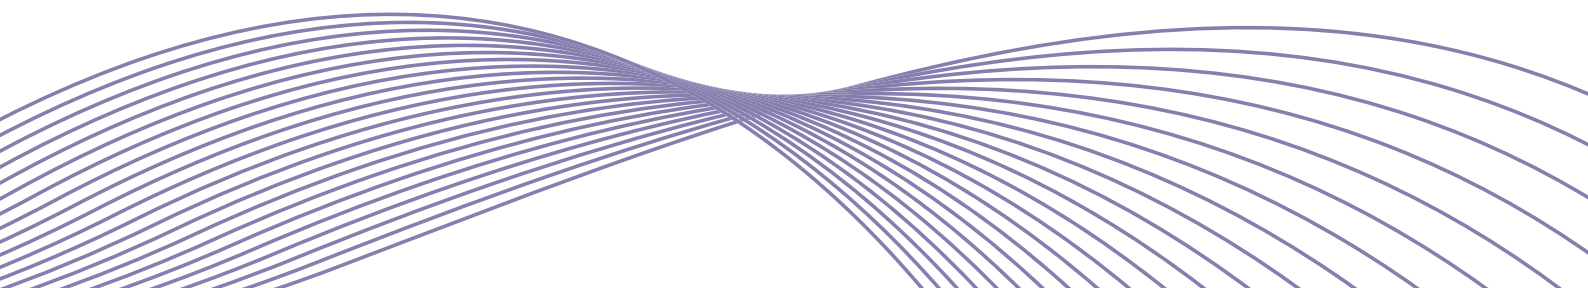

The **multidisciplinary approach for the treatment of oncological diseases** will be one of the main focuses of the meeting aimed at improving feasibility, increasing efficacy, and promoting the sustainability of care.

At IASGO 2023 we will discuss on **precision medicine and molecular targeted therapy** seeking to optimize the pathway for early diagnosis, tailor therapeutic interventions, and assess prognosis.

We will also address the benefit of **minimally invasive laparoscopic and robotic approaches** and the latest **artificial intelligence technologies** applied to medical care.

In addition, we will demonstrate that **lifestyle** plays a fundamental role in the well-being and health of patients. Likewise, proper **nutrition** counteracts the side effects of chemotherapy and helps faster recovery after surgery. This and much more will be shared at 34th IASGO World Congress!

We are looking forward to welcome you in Verona, a spectacular city, a key part of Italian history, a symbol of art and culture, and a recognized UNESCO heritage.

MEDTECH

IASGO 2023 has been found COMPLIANT with the MedTech Europe Code of Ethical Business Practice.

IASGO

IASGO was founded in Amsterdam in 1988. Today, we are privileged to have strong. IASGO sections in more than 70 countries, which greatly assists in assessing educational needs.

The main goal of this organization has been and remains globalization of medical knowledge and expertise through a well-structured and precisely organized system of continued medical education. It is our belief that medical knowledge and expertise belongs to every human being on this planet, and that has to be available beyond any kind of discrimination, based on individual institutional or national level, to every patient that strives for survival because of challenging and life-threatening diseases.

Twenty eight years after its inception, the International Association of Surgeons, Gastroenterologists and Oncologists is a vibrant, strong and influential body of surgeons, gastroenterologists, hepatologists, oncologists, endoscopists, laparoscopists, pathologists and radiologists, from over 90 different countries world wide and with over 1,700 members.
